## SUMMARY

Computer Science Engineering student with strong interest in software development and artificial intelligence. Experienced in building AI-powered applications including legal assistants and health diagnosis systems. Skilled in Python, Java, and Flask with a focus on practical problem solving and scalable system design, I also enjoy photography as a creative hobby.

## EDUCATION

Bachelor of Engineering – Computer Science and Engineering 2023-2027

**Vel Tech Rangarajan Dr. Sakunthala Engineering College**

Cumulative GPA: 8.0 / 10

## TECHNICAL SKILLS

Programming Languages: Python, Java, C

Web Technologies: HTML, JavaScript, Flask

Tools & Technologies: FAISS, Vertex AI, Gemini API, Git, Canva, Photoshop

Core Concepts: Data Structures, Algorithms, Machine Learning Basics, SQL Basics

## PROJECTS

### AI Powered Health Diagnosis Web App

- Built an AI-powered health diagnosis system using Gemini and Vertex AI to analyze symptoms and suggest possible conditions.
- Designed a web interface allowing users to enter symptoms and receive AI-generated responses instantly.  
Tech Stack: Next js, React js, Gemini API, Vertex AI, REST APIs, JavaScript, HTML, CSS

### RAG Based Legal Assistant

- Developed a Retrieval-Augmented Generation (RAG) legal assistant using Indian law datasets.
- Implemented FAISS vector search to retrieve relevant legal sections efficiently.  
Tech Stack: Python, FAISS, Hugging Face Embeddings, Flask/Streamlit, Indian Legal Datasets, T4 model

### Diabetes Prediction System

- Developed a machine learning model using Random Forest to predict diabetes risk from health parameters.
- Built a Flask web application allowing users to input health data and receive real-time prediction results.  
Tech Stack: Python, Scikit-learn, Random Forest, Pandas, NumPy, Data Preprocessing, Model Evaluation

## WORK EXPERIENCE

### Python Development Intern

Jul 2025 – Aug 2025

- Developed web scraping program in Python
- Built a Flask-based web application integrating backend logic with a simple user interface.
- Strengthened programming fundamentals and debugging skills through practical development tasks

## CERTIFICATIONS

Accenture – Software Engineering Job Simulation

NPTEL – Privacy and Security in Social Media

Educative – Java Programming Course

- Star Ideation Award – Selected among the Top 50 projects out of 800 for innovative project development at college-level.

## RELEVANT ACTIVITIES

- Solving Data Structures and Algorithms problems on LeetCode.
- Studying Java programming and object-oriented concepts.
- Reading technology articles and books to stay updated with emerging software trends.
